

SISTEMAS OPERACIONAIS

AULA 2 – CONCEITO DE SO E HISTÓRICO

PRIMEIRA GERAÇÃO 1945/1955

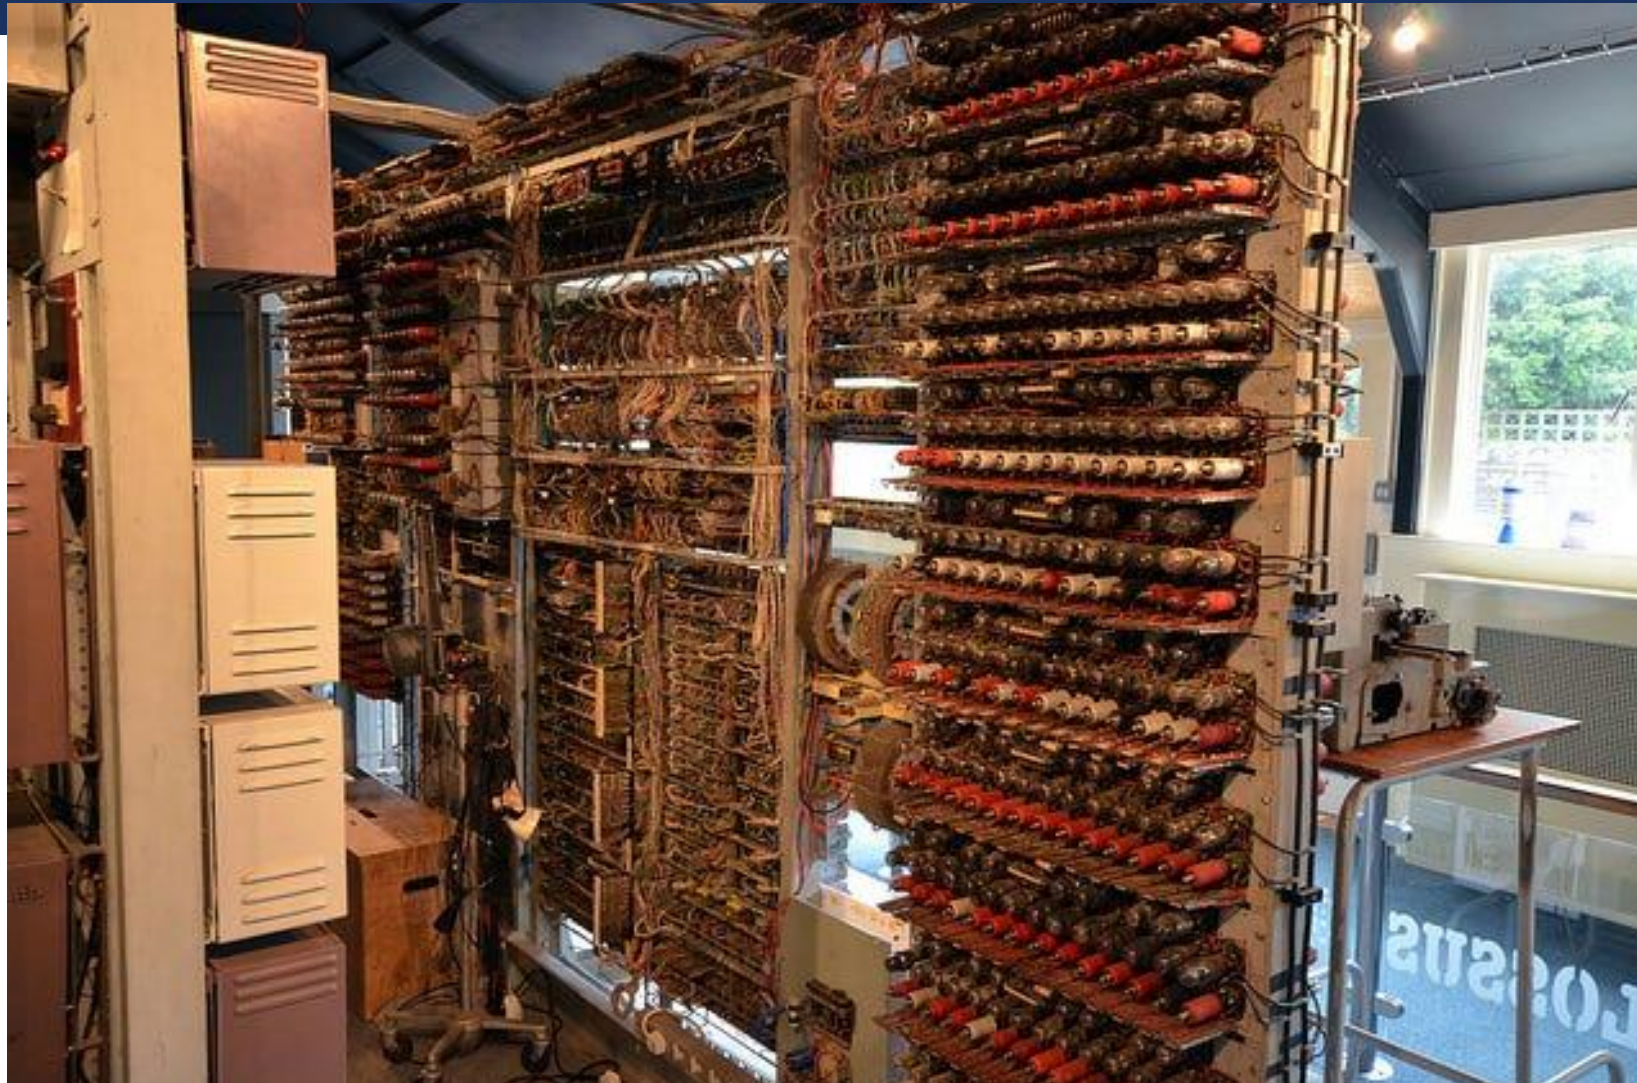

Computadores a Válvula

The diagram consists of three horizontal bars of a medium blue color, each containing a white circle on its left side. These circles are connected by a thin, light blue line that forms a vertical zig-zag pattern. The background of the slide is a dark blue gradient with a blurred image of a computer circuit board on the right side.

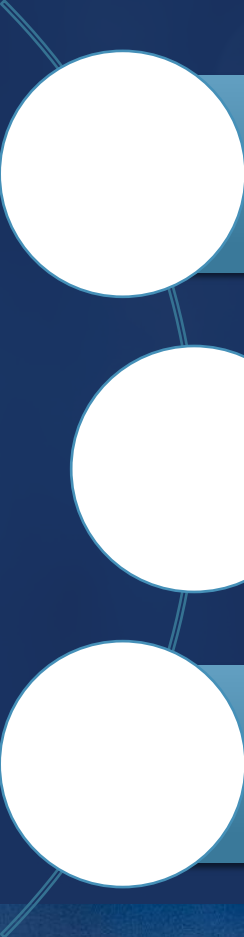

Ausência de um SO

Programação em linguagem de máquina

COLOSSUS MARK I

SEGUNDA GERAÇÃO 1955/1965

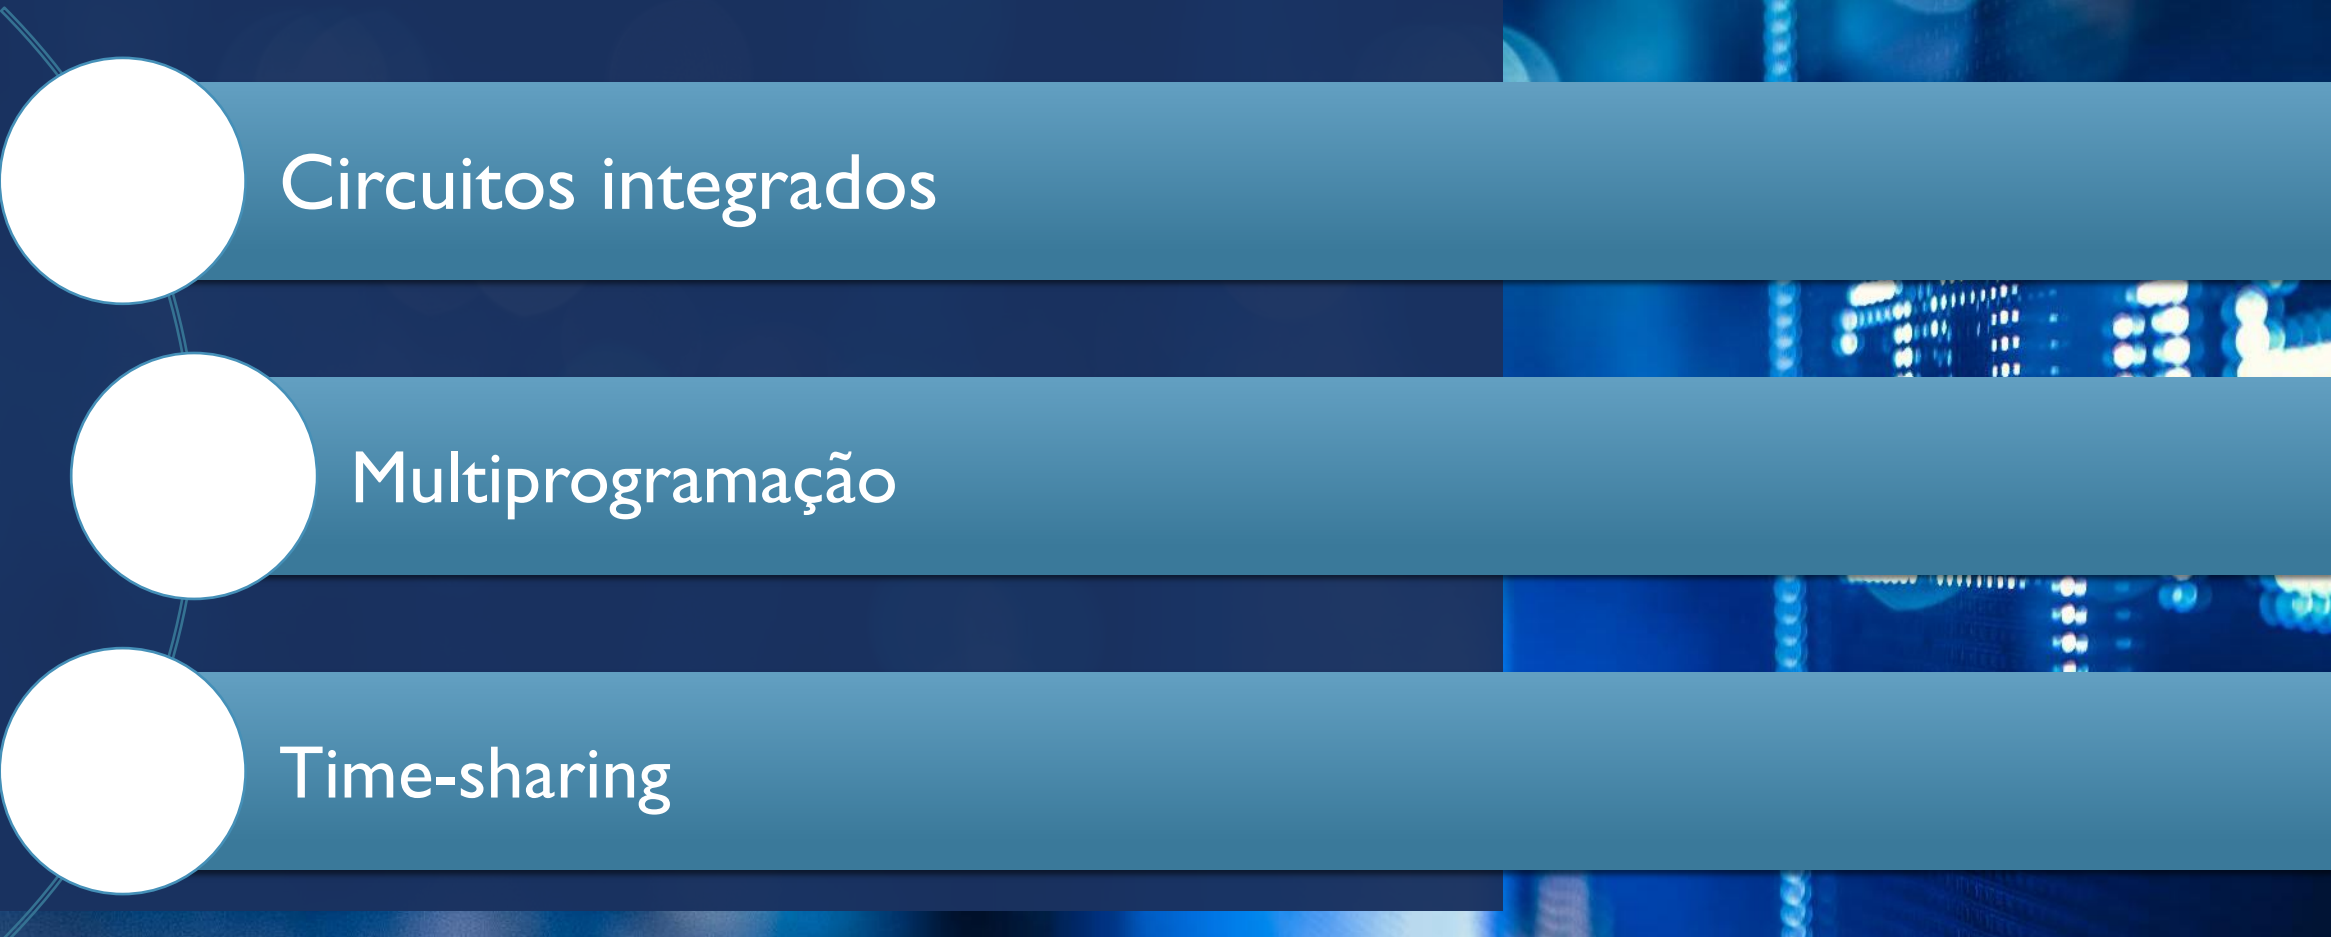

Invenção e uso dos transistores

Uso da linguagem Assembly e Fortran

Sos do tipo lote (batch)

TERCEIRA GERAÇÃO 1965/1980

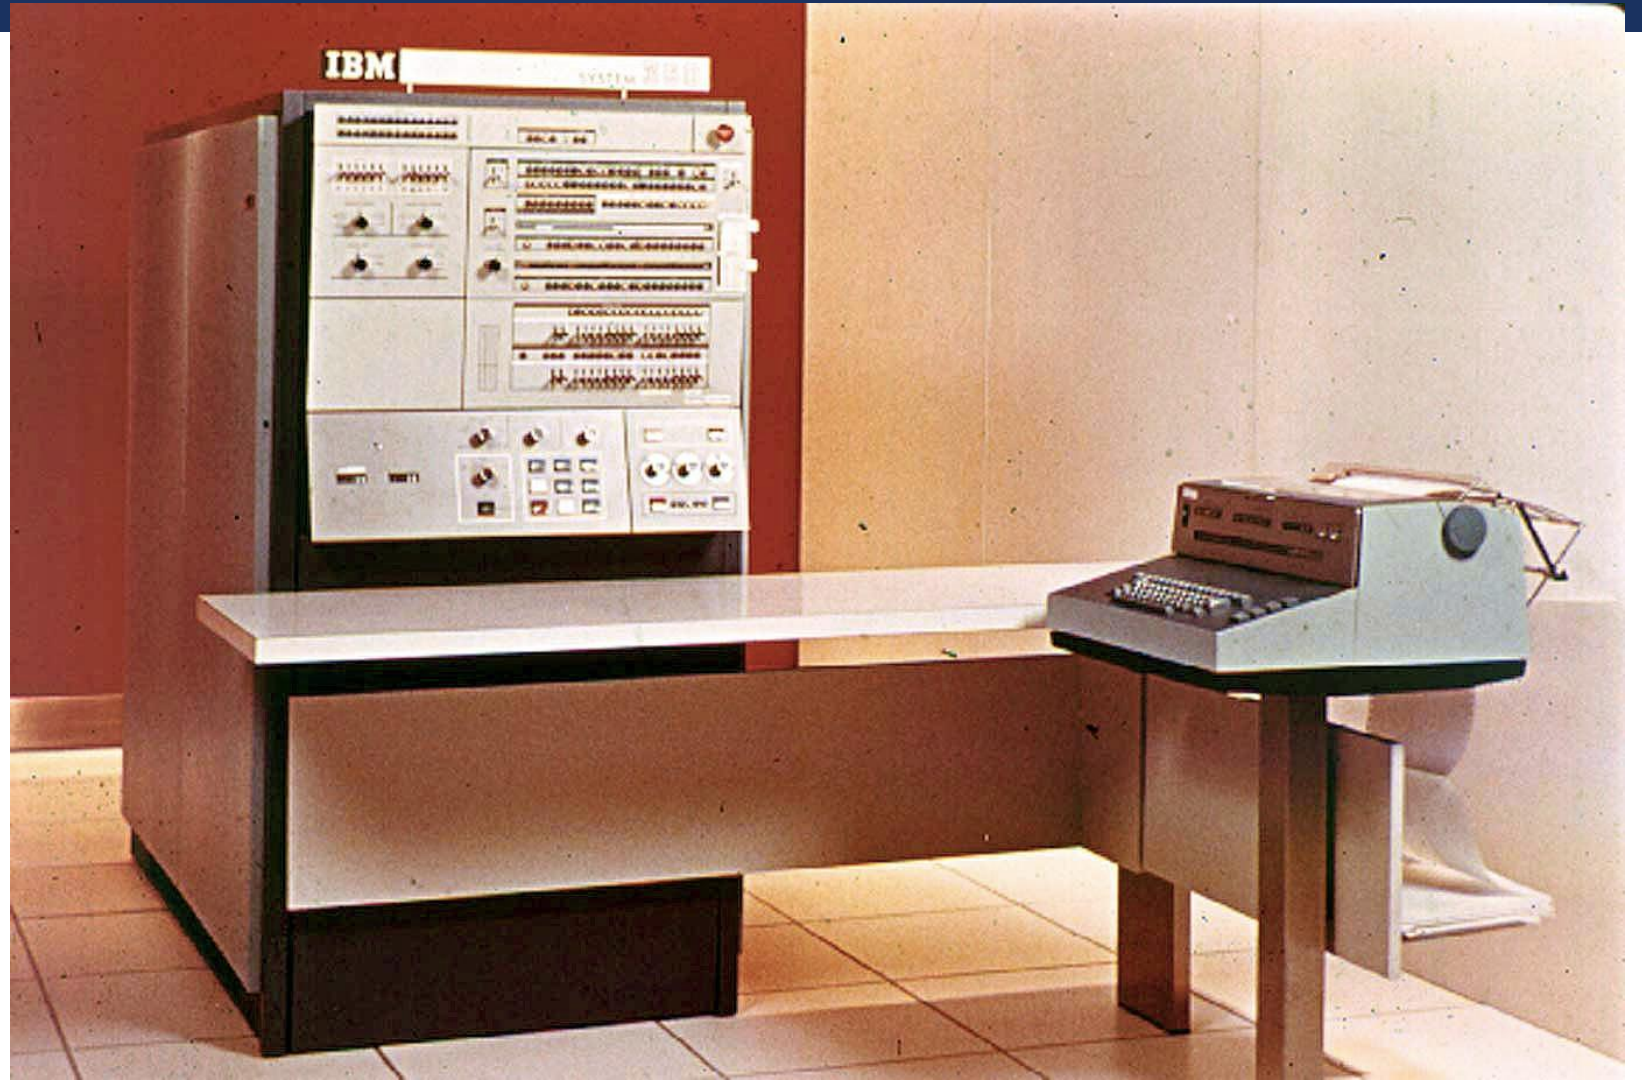

Circuitos integrados

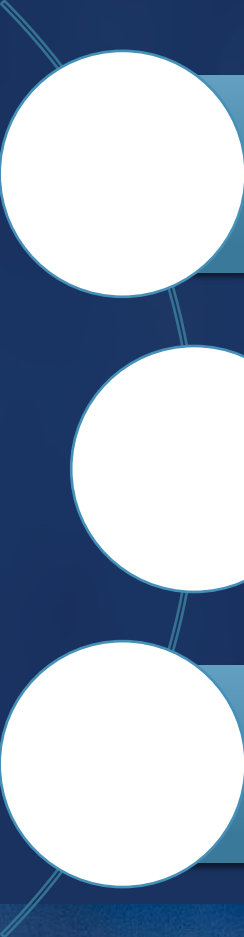

Multiprogramação

Time-sharing

SISTEMA OS/360 IBM → PRIMEIRO A USAR CIRCUITOS SSI

QUARTA GERAÇÃO 1980/1990

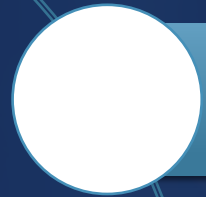

Circuitos integrados LSI Large Scale Integration

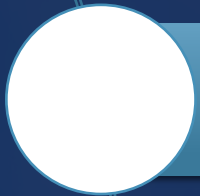

SO para micros: MS-DOS e Windows

Difusão da Internet

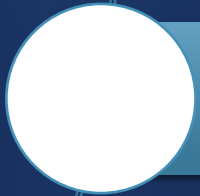

QUINTA GERAÇÃO 1990 / ATUAL

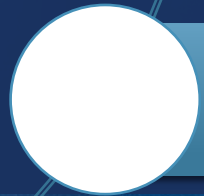

Amplo uso da Internet

SO com suporte para TCP/IP

Cliente/Servidor
